

Daily Dance –group for practice of improvised dance

Efterår 2015

We **investigate** a dance practice where thought is visible and the whole intelligent body is ready, receptive and active at the same time.

Anu and Ellen will offer a warm up /direction for the days session.
We invite members of the group to offer warm ups and propose scores, if they wish.

We want to study and practice scores for duet work, smaller groups and whole group. Taking different perspectives on listening, articulating shape and ...

We aim to perform/share something at Forsøgsstationen before Christmas. (not doing something very different to make a piece, but frame our practice.)

We would like to work toward a performance around June 2016 – exposing the practice. We play with the thought of inviting a choreographer specialised in improvisation, perhaps Rosalind Crisp, to create the performance with us.

We would like the group to have continuity and meet regularly once a week.
